**WOOD PELLETS  
Premium Quality**

**Wood pellets exclusively destined for wood-stoves and boilers designed for this type of fuel.**

Wood pellets produce less humidity than traditional log burning systems and give 90% heat output efficiency. The carbon-dioxide produced enters the renewable energy cycle and does not participate in increasing the greenhouse effect. There are no sulphur-monoxide emissions during combustion.

**Composition**

Our product is simply compressed sawdust and is free of all chemical or binding agents. Made from 100% of conifer

**Budget benefits**

Heating a house with a surface area of 100m<sup>2</sup> requires 2 to 3 metric tons of wood-pellets or between 400 and 600 € per year.

**Manufacture**

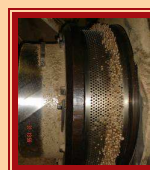

Our factory can produce up to 60,000 metric tons of wood-pellets per year. Deliveries can be supplied by filmed palettes containing 15 or 20kg paper-sacked pellets; or by « big-bag » containing 1,0 metric ton ; or by bulk order.

**Quality**

Natural Energie's wood pellets follow the certifications : DIN+, NF, Marque ITEBE.

<b>Diameter</b>	6 mm	<b>Chemical agents</b>	0 %
<b>Lenght</b>	10 à 30 mm	<b>Ash content</b>	De 0,32 à 0,55 %
<b>Moisture</b>	< 8 %	<b>Fines</b>	≤ 1 %
<b>Heating value raw</b>	> 4800 Wh / kg	<b>Chloride</b>	≤ 0.03 %
<b>Heating value dry</b>	> 5080 Wh / kg	<b>Azote</b>	≤ 0.3 %
<b>Masse Volumique</b>	> 650 Kg / m <sup>3</sup>	<b>Sulfur</b>	≤ 0.05 %
